EKA-

Sustainability and fair trading standards are at the heart of eka.

Working with Auroville India has allowed eka to concentrate on creating collections of beautifully hand crafted vegan hats, eco friendly scarves and shopper bags that are at the cutting edge of trends with an added gift to the buyer of sustainability and social conscience.

We here at eka don't think that ethical credentials should mean that style, design or luxury are compromised- 'GOOD' fashion shouldn't be boring, you should be able to indulge yourself buying handmade, gorgeous accessories that you love and the fact that it has been created ethically should be an added gift from us.
